

CLAIMS

1. A fluorine-containing polymer for treating a masonry, comprising:
 - (1) a fluoroalkyl group-containing monomer, and
 - 5 (2) a silicon-containing monomer in the amount of 2.0 to 6.0 % by weight based on the polymer.
2. The fluorine-containing polymer according to claim 1, wherein the silicon-containing monomer is a compound having a silane group and a carbon-carbon double bond.
10
3. A composition for treating a masonry, comprising:
a fluorine-containing polymer which comprises
 - (1) a fluoroalkyl group-containing monomer, and
 - 15 (2) a silicon-containing monomer in the amount of 2.0 to 6.0 % by weight based on the polymer, and
an organic solvent.
4. A method of producing a treated masonry, which comprises
20 applying, to a surface of a masonry, a composition comprising:
a fluorine-containing polymer which comprises
 - (1) a fluoroalkyl group-containing monomer, and
 - (2) a silicon-containing monomer in the amount of 2.0 to 6.0 % by weight based on the polymer, and
25 an organic solvent, and then
removing the solvent.
5. A masonry produced by the method according to claim 4.
